Index Copy Card

Lots of information. Date order received. Die number. Sometimes engraver.

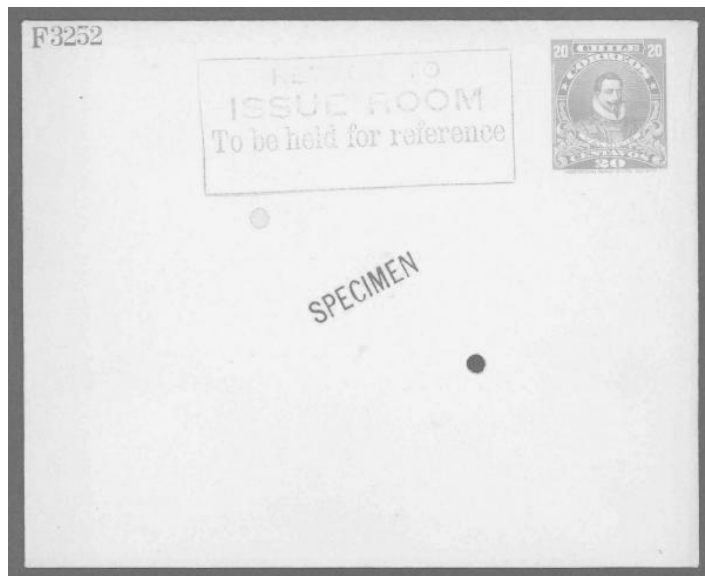

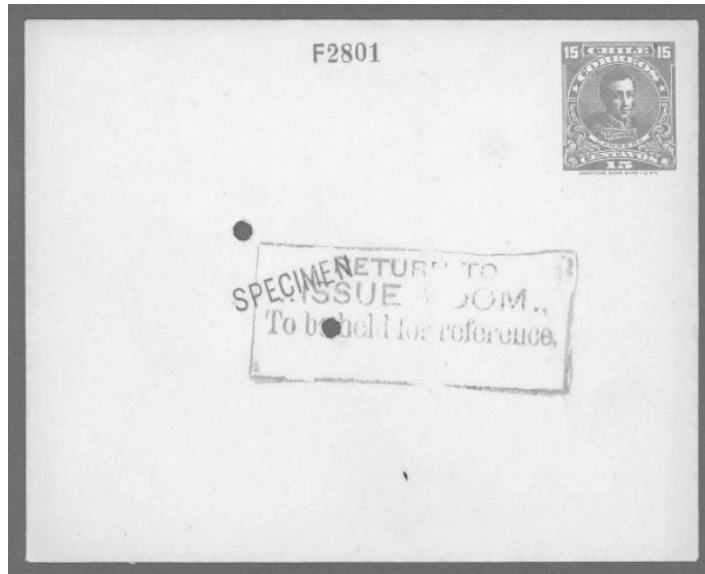

Die Numbering

- 1858-1879 Multiple series, all starting with 1. Die number does not uniquely identify die. No postal stationery during this period.
- 1879-1923 Multiple series all starting with C-1. Die number does not uniquely identify die.
- 1924 – 1980s
Renumber old dies between 1-49999
New dies start with 50000
Now die number uniquely identifies die.
- Die proofs taken of renumbered dies
- Unfortunately I do not have any examples with die number > 50000

Chile 1907 100 centavos parcel card indicia.

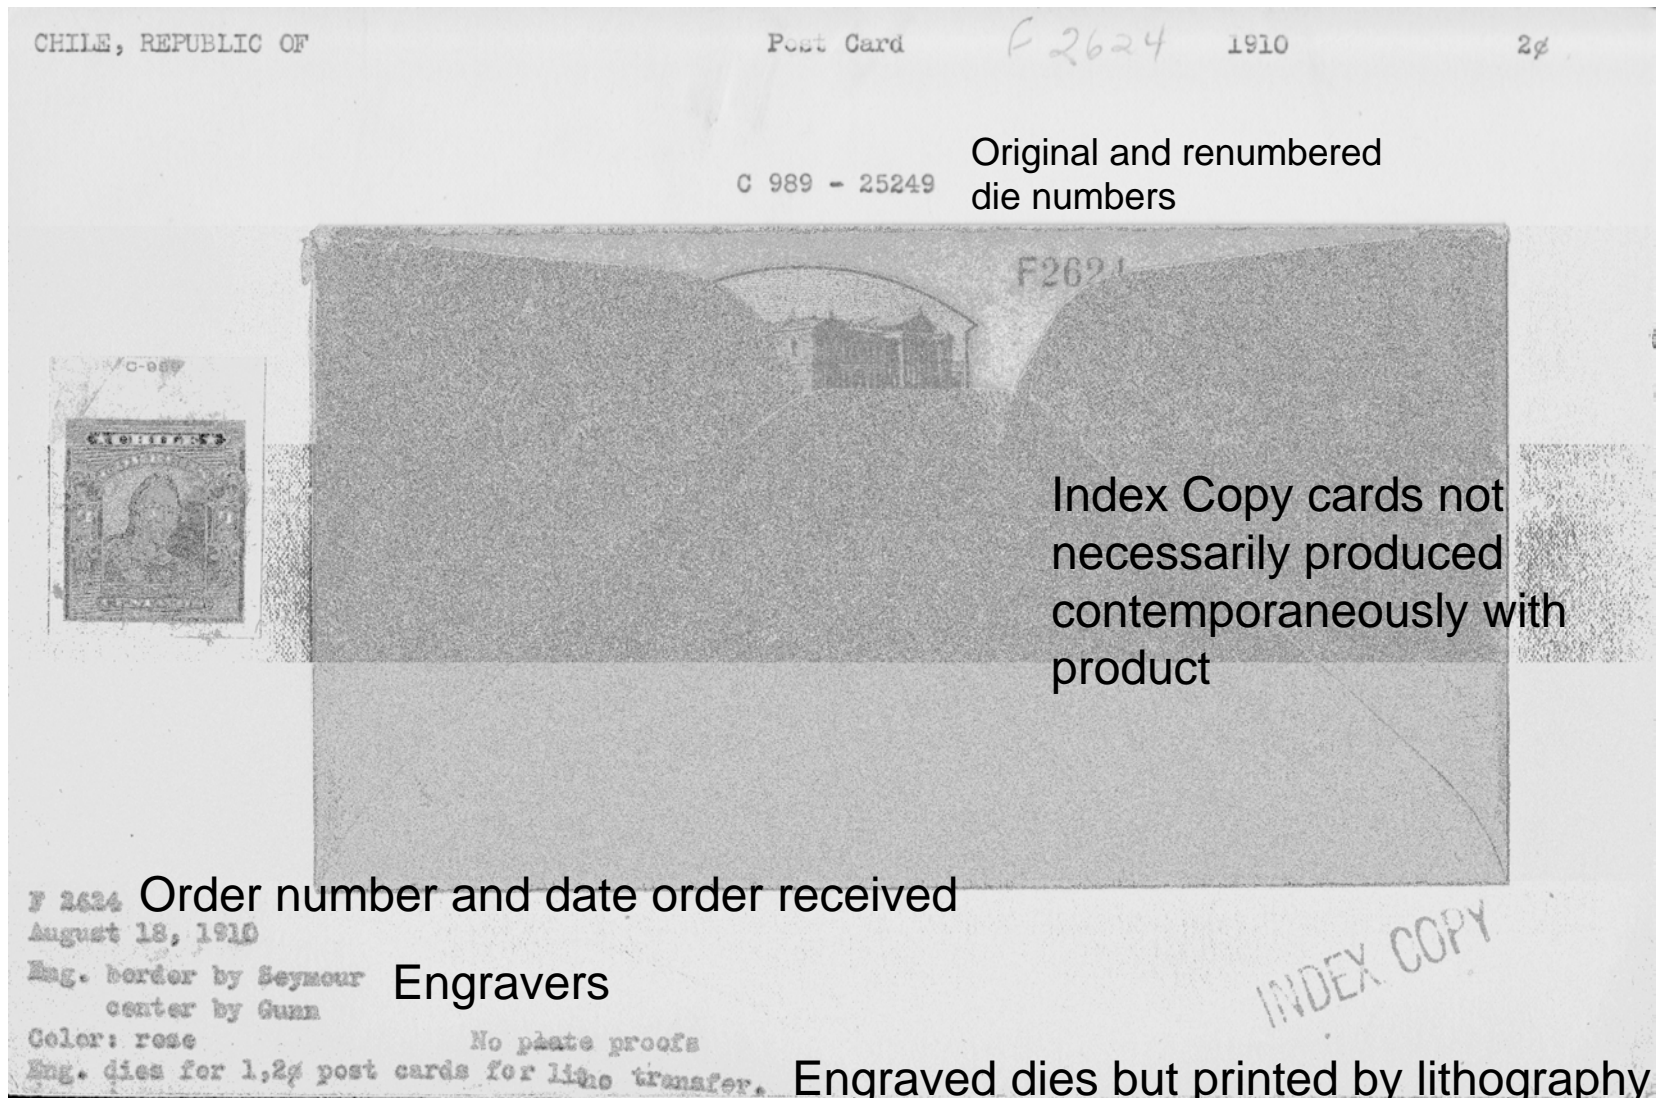

Order Numbers

- Orders given numbers starting in 1902.
- Domestic orders have no prefix.
- Foreign orders start with F
- Remember ABNC did more the postage stamps, postal stationery, etc. Not all numbers are associated with “philatelic” items.
- Used different fonts over the years.

Chile 1911 and 1912 envelopes

Index Copy Card revisited

Sometimes looks are deceiving

- Appears to be a specimen.
- Handstamp applied to incoming correspondence and attachments.
- It is a model for February 1892 order for 1c postal cards.
